1. Claims 1, 3 and 24-27 are generic to a plurality of disclosed patentably distinct species comprising different chemical structure and composition and the method of preparing thereof used in liquid crystal or optical element. For example, claims 1, 3, 24-27 are claimed as different chemical compounds; claims 6-9 are claimed as different compositions; claims 10-13 are claimed as different polymers and Claims 28-31 are method of preparing different compounds. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species including the chemical structure and the notations (either compound, composition, polymer or a method of preparing the compound thereof), even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. It is noted that the claims 14-23 are in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n).

3. It is also noted the formulae (4)-(7) in Claim 9 are not defined.

In Claims 25-27 and 31, the notations (A1-A6 and X) should be defined.

In Claims 29-30, the formulae A3 and A4 also should be defined.
